# Digital Divide Index Score

### 2017 DIGITAL DIVIDE PROFILE

## Hart, Kentucky

The digital divide index score (DDI) ranges between 0 and 100, where a lower score indicates a lower divide. The infrastructure adoption score and the socioeconomic score both in a 0 to 100 range as well contribute to the overall DDI. Listed below each score are the indicators used.

### Infrastructure/Adoption Score

If this score is much higher than the socioeconomic score, efforts should be made to upgrade the broadband infrastructure.

10.2%

of people without access to fixed broadband of at least 25 Mbps down and 3 Mbps up

30.6%

of households with no internet access (not subscribing)

**27.6%** 

of households without a computing device

**12** 

median maximum advertised download speed in Mbps

median maximum advertised upload speed in Mbps

60.75

#### Socioeconomic Score

If this score is much higher than the infrastructure/adoption score, efforts should be made to focus on digital literacy and exposing residents to the benefits of the technology.

16.1%

population ages 65 and older

ages 25 and older with less than a high school degree

23.1%

of individuals in poverty

25.1%

21.1%

noninstitutionalized civilian population with a disability
